PROFIL

Frontend developer focused on React and Next.js, currently in an intensive phase of self-study and building personal projects. I have a strong background in software testing, scenario design, and API work, which allows me to build high-quality and reliable applications.

I focus on clean code, user experience, and seamless frontend-backend integration.

I am looking for an opportunity to grow as a frontend developer in a modern development team.

WORK EXPERIENCE

Frontend Development (self-study & projects)

02/2026 – present

- development of web applications using React and Next.js
- UI design and component-based development
- working with APIs (fetch, error handling, data structures)
- building projects: portfolio website, mobile application, reservation system
- focus on UX and Frontend ↔ Backend integration

JABLOTRON CLOUD Services – Software Tester

2/2022 – 1/2026

- automated testing of APIs and mobile applications (Jest, TypeScript, Appium)
- design and implementation of test scenarios (E2E, integration tests)
- testing REST, SOAP, and GraphQL APIs
- collaboration with developers and product owner in an Agile team
- development of internal tools (e.g., Testmo reporter in TypeScript)

Technologies: TypeScript, Jest, Appium, GraphQL, REST API, GitLab, Testmo, Grafana, ConfigCat, Postman

ZF Automotive – System Test Engineer

1/2018 – 1/2022

- testing software for automotive systems (EPB)
- bug analysis and reporting
- preparation of test environments
- working with diagnostic tools

T-Mobile Czech Republic – Developer (Mediation)

11/2011 – 11/2013

- data processing and implementation of changes in the backend system
- working with SQL (Oracle)
- testing and documentation in English
- working in an Agile team

Converging Network Solutions – Junior Programmer

11/2008 – 10/2011

- development and maintenance of applications (PHP, Java, MySQL)
- testing (Selenium, PHPUnit)
- implementation of requirements and documentation
- collaboration on international projects

ComAp – Programmer (Delphi)

6/2007 – 10/2008

- development of desktop applications in Delphi
- software testing and maintenance

EDUCATION

Technical University of Liberec (TUL)

- Ing. – Information Technology (2006–2008)
- Bc. – Electronic, Informations and Control Systems (2003–2006)
