TECH STACK

React & Next.js

TypeScript & ES6+

TanStack Query

React Hook Form

Tailwind CSS / HTML / CSS

REST API & Swagger / OpenAPI

Turborepo / Monorepo Architecture

ENGINEERING & QA

API & E2E Testing (Jest, Appium)

OpenAPI Client Generation

Containers: Podman & Docker

Git / SQL

English: B1
Czech: Native

PROFIL

Frontend developer focused on React, Next.js, and TypeScript with over 15 years of experience in IT.

I combine software development experience with a strong background in automated testing.

I focus on maintainable code, API integration, and reliable error handling.

My strengths are understanding complex systems and identifying root causes.

WORK EXPERIENCE

Frontend Development – Collaboration & Personal Projects

02/2026 – present

- Installation wizard: rewriting in React and TypeScript, using React Hook Form for forms and TanStack Query with Fetch API for asynchronous data. Environment: Java backend, NGINX, Podman.
- Reservation system: Turborepo, Next.js, NestJS, Prisma, PostgreSQL, JWT authentication with httpOnly cookies, Server Components, internationalization, and tests.
- Other projects: a Next.js portfolio and a mobile application built with React Native / Expo.

JABLOTRON CLOUD Services – Software Tester

2/2022 – 1/2026

- Developed automated API and iOS application tests using TypeScript, Jest, and Appium, REST and GraphQL.
- Verified complex workflows across cloud services and devices, investigated defects and collaborated with developers.
- Developed a Testmo reporter in TypeScript, worked with GitLab CI, Grafana, and Postman.

ZF Automotive – System Test Engineer

1/2018 – 1/2022

- Performed integration testing of electronic parking brake software on a HIL test bench, prepared the environment and requirements-based tests, performed diagnostics, and investigated root causes.

T-Mobile Czech Republic – Developer (Mediation)

11/2011 – 11/2013

- Developed telecommunications data processing logic using MediationZone and Oracle SQL, fixed defects, tested changes, and produced documentation in English.

Converging Network Solutions – Junior Programmer

11/2008 – 10/2011

- Micropayment: developed user interfaces and related functionality using PHP, Java, and MySQL, automated testing with Selenium and PHPUnit.
- Intelligent Network – prepaid services: analyzed requirements, implemented changes, tested in OTE, and analyzed execution traces.
- Mediation – T-Mobile project: implemented changes, tested, and maintained telecommunications data processing software.
- Requirements analysis, implementation, and technical support, project collaboration in South Africa and on-site support in Kuwait.

ComAp – Programmer (Delphi)

6/2007 – 10/2008

- Developed, tested, and maintained desktop applications in Delphi.

EDUCATION

Technical University of Liberec (TUL)

- Ing. – Information Technology (2006–2008)
- Bc. – Electronic, Information and Control Systems (2003–2006)
